Briefly about the main

Have you ever thought about how much time and money we spend looking for
that magic product that will make a hairstyle long-lasting?
And how much money do we have to spend on a good tool for hair?
Yes, I guess it's a fortune!

Relax!

They are no more trying and failing to find the right product and hair tools.
All the best quality, tested, cost-effective hair products are already here!
But knowing what products to buy is not enough for a beautiful hairstyle,
it is vital to know a few secrets to a long-lasting hairstyle.
I will share with you the most important secrets:

Let's talk about each one in more detail.
I advise you to read to the end, all points are extremely important!

Hair preparation

Hair preparation begins, of course, with the washing of the head.

I highly recommend washing with shampoo twice.

Don't forget to also apply conditioner/balm to the hair
from the middle of the length to the ends.

On wet hair, you can and should use properly selected care products.

They will not only take care of the hair

but also help the future lasting hairstyle.

Usually, such products include those that help change the texture of the hair.

Heat protection

Heat protection is probably one of the most important components of healthy hair when working with hot tools.
You can't use curlers and straighteners without it!
Even if you don't see your hair damaged now, you're likely to notice splitting ends and dullness of your hair later.

**WHEN I PUT A HOT CURLING TOOL TO MY HAND, IT HURTS.
SO MY HAIR HURTS TOO!**

There are a variety of heat protection products available, many hair care products already contain heat protection properties and that's a huge plus for them!

Here is a compilation of some of the highest quality heat protection products on the market.

WHY WITH HOLD?

THESE HEAT PROTECTION PRODUCTS GIVE AN EXTRA THICKENING AND HOLD, WHICH GUARANTEES LONG-LASTING AND BEAUTIFUL HAIRSTYLES!

Styling - what's it for?

A beautiful and long-lasting hairstyle is not only a sleight of hand
but also the properly selected styling and tools.

You no longer need to buy useless products
that don't fit, don't work, don't help.

Now there is a silver bullet for problems with hair styling.

Now there's no problem with selecting the proper and high-quality styling products.

All the coolest and most necessary are collected here.

Each of the stylings listed below is working,
the main thing is to use it properly and as intended.

To do this, read all the descriptions in this guide attentively.

HOW DOES IT WORK?

WHAT KIND OF HAIR IS IT GOOD FOR?

WHERE TO BUY?

HOW MUCH IS IT?

Hold

As much as we would want to,
without extra hold, not many hairstyles will be long-lasting.
There are two types of hairspray on the market: aerosol and non-aerosol.
Their hold function is of course the same. Otherwise, there are differences.

Aerosol hairsprays are more suitable for the final fixation of the hairstyle.
They are sprayed in a large and almost invisible cloud.
The non-aerosol hairsprays are most often used to hold textured and any hairstyle.
They are sprayed in wet droplets and settle almost instantly on the hair.

Any kind of hairspray should be applied to the hair at a distance of 30-40 cm.
A large amount of hairspray on the hair can weigh the strands
and the curl will quickly straighten.
Therefore, use the hairspray correctly and in moderation.

Texture creation

The texture in the hairstyles can be perfectly sleek or perfectly messy.
They have come up with completely different products to create each one.

And it's time for you to get to know them better!

Sleekness is responsible for:

But perhaps creating a messy/light texture
is one of the most popular techniques right now.

The absolute helpers in creating beautiful messiness and lightness
on the head are the texturizing, salt, and sugar hairspray.
They work in the same way. They thicken, a little dry, and hold the hair.
Very delicate look and are almost not felt on the hair,
but they give a colossally cool result.

SUGAR SPRAY GIVES A GLOSSY FINISH

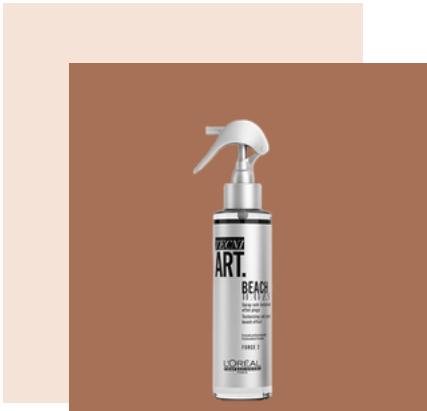

SALT SPRAY GIVES A MATTE FINISH

Cream, but not for hands

It is necessary to moisturize not only your face and hands but also your hair. Hair cream also has a moisturizing effect, works as an antistatic, and helps to create a perfectly sleek and laconic hairstyle.

You can forget about annoying flyaways and small sticking-out hair.

IT SEEMS THAT
THERE IS A SOLUTION
TO MY PROBLEMS

The hair cream gives shine to dull and dry hair.
All owners of lightened, curly, and porous hair should pay special attention to this point!

SEEMS LIKE
SOME KIND OF
UNIVERSAL PRODUCT

The hair cream helps to make your hair cleaner and
to highlight certain beautiful strands and curls.
Some types of creams have an additional hold function.
With the help of such creams,
you can easily shape curls.
The curls become more durable and clear.

Volume in the hairstyle

The volume in the hair, sometimes, is vitally important.
It can be used to correct the oval of the face and the length of the neck,
as well as to create a beautiful shape of the hairstyle.
The right amount of volume prolongs the last of any hairstyle!

I DIDN'T KNOW THAT

You can create a volume at the root during the hairstyle creation process
using the right teasing or a special styling product.

The hair styling products and teasing together give a very dense
and long-lasting voluminous hairstyle.

WHAT KIND OF
STYLING PRODUCTS
WOULD HELP ME?

Hair powder, powder spray, or dry shampoo.
All of these products work as an adsorbent, i.e. they absorb extra sebum.
After applying the product, the hair becomes thicker and a little drier.
Making hair volume for the whole day is not difficult on such hair.

Hair tools

Without a quality tool, it's hard to talk about the lasting of the hairstyle.

Yes, curls can come out on an average quality tool,
but no one will guarantee you the lasting durability and safety of your hair.
This section has considered 5 criteria for selecting the perfect tool.
Be sure to take note!

Four basic and most necessary hair tools have been selected for you.
They offer an ideal price/quality ratio.
Hair dryers for gentle drying and styling.
Curlers and straighteners for different curl creation techniques.
Crimpers for creating root volume and working through the full length of the hair.
